

Strategic school improvement with Tassomai

Why Tassomai works for senior leaders

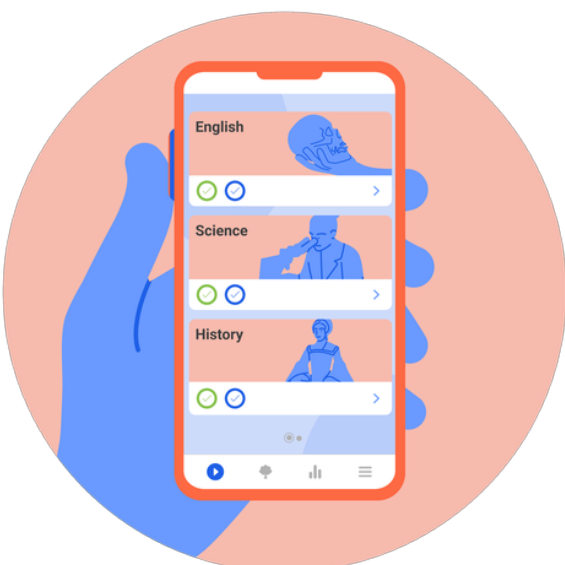

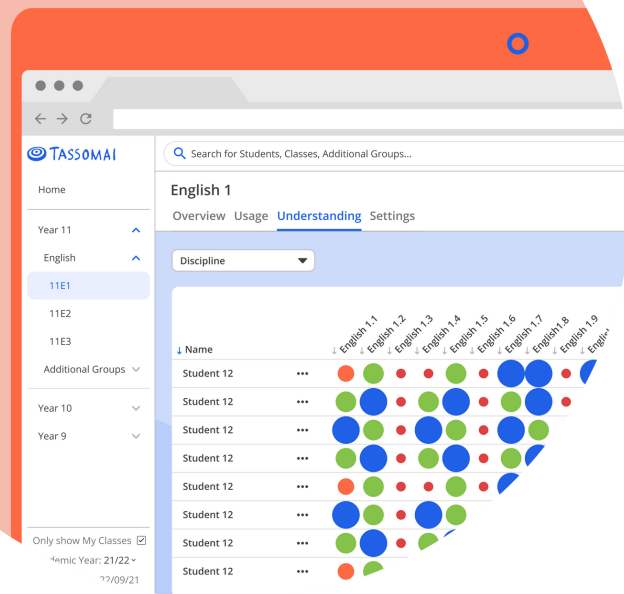

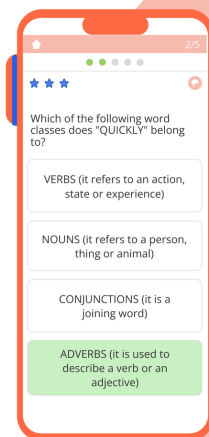

Guaranteed results across your entire school

Individual subject success is valuable, but true school transformation requires a unified approach.

Tassomai guarantees **grade 5+ outcomes** across multiple subjects:

- English Language & Literature
- Mathematics
- Science
- Modern Foreign Languages
- History
- Geography
- Computer Science

When implemented school-wide, Tassomai **consistently improves homework quality**, student engagement, and progress tracking across every department. This unified approach eliminates the gaps and inconsistencies that emerge when departments use different systems.

Smart budgeting:

Premium learning support across all departments

While individual departments might hesitate to allocate budget to digital learning, a whole-school implementation of Tassomai delivers exceptional value at **less than £1 per student per subject annually**. This centralised approach reduces overall costs and ensures every department has access to premium digital learning tools without straining individual budgets.

*"Tassomai was **one of the best investments I ever made!** Encouraging students to hit their Daily Goals paid off and results that year didn't just speak for themselves - they sang from the rooftops!"*

Claire Crichton-Allen, Head of Faculty, Matthew Moss School

See your whole school's progress at a glance

Rather than piecing together insights from multiple platforms, Tassomai provides leadership teams with comprehensive analytics across all subjects:

- Track engagement patterns across departments
- Identify school-wide learning trends
- Monitor progress gaps between student groups
- Generate unified reports for governors and Ofsted

Support vulnerable students automatically

Instead of relying on individual departments to track and support vulnerable students, Tassomai automatically:

- Delivers personalised intervention exercises for Pupil Premium students
- Provides specialised SEND support* (launching September 2025)
- Reports weekly on engagement and progress across student groups
- Shows over **30% improvement in attainment** for supported groups

Give teachers more time to teach

By implementing Tassomai school-wide, you:

- Save dozens of teaching hours through automated marking
- Reduce admin overhead with simplified management
- Access unlimited CPD training and support
- Receive regular data analysis and strategic insights

Your partner in school improvement

Tassomai partners with school leaders to ensure success:

- Dedicated implementation guidance
- Regular strategic reviews
- Custom multi-academy trust reporting
- Ongoing platform enhancements

Transform your school's approach to digital learning with one strategic decision!
